ARCHIDEX SUSTAINABLE EFFORTS

It is our goal to operate in an environmentally friendly ecosystem, hence, we believe that continuous efforts and commitments need to be made to achieve it. With that, we endeavour to support our eco initiatives and sustainable efforts to reduce carbon footprint through these approaches :-

Whenever possible, recycled or FSC certified paper will be used for our printed materials

Digitising our marketing collaterals such as the use of QR codes, ePreview, eDirectory, eListings, eShowguide, eHandbook, among others

Exhibition timber stand structure and shell scheme stand materials will be reused and walkway carpets first kept for possible reusability

Usage of energy saving LED lightings is compulsory for all exhibition stands

Care will be taken and to limit or avoid materials with added Urea Formaldehyde, which in high levels can be harmful to people. Simultaneously, all paints, adhesives and sealants used shall be low Volatile Organic Compound (VOC), limiting its effects on people's health and the environment
